SUMMARY

AI/ML Engineer with hands-on experience in building and evaluating machine learning and deep learning models using Python, TensorFlow, and scikit-learn. Developed real-world projects including a hybrid recommendation system and a real-time sign language transcription system using RNN-LSTM. Experienced in data preprocessing, feature engineering, and model evaluation. Strong interest in Generative AI and currently exploring tools like LangChain and LangGraph for building intelligent, production-ready applications. Passionate about solving real-world problems through data-driven and scalable ML solutions.

EXPERIENCE

AI/ML intern

Edunet Foundation

📅 06/2025 - 07/2025 📍 Remote

Internship focused on AI and ML technologies

- Completed a 4-week AICTE Microsoft internship focused on AI, ML, and Azure Cloud
- Built a supervised ML model in Python for cricket match outcome prediction using data preprocessing, feature engineering, and model evaluation

EDUCATION

Senior Secondary Schooling

Delhi Public School, Ruby Park

📅 03/2009 - 04/2023 📍 Kolkata

- Completed senior secondary education with a strong foundation in mathematics, science, and computer science.
- Actively participated in academic and extracurricular activities, developing discipline, problem-solving skills, and a consistent learning mindset.

B.tech, Electrical and Computer Engineering

Amrita Vishwa Vidyapeetham

📅 08/2023 📍 Coimbatore

- Final year B.Tech student in Electrical and Computer Engineering with a strong focus on core electrical concepts, machine learning, data analysis, programming, and applied problem-solving through coursework and hands-on projects.

SKILLS

C/C	Python	HTML	CSS
JavaScript	NumPy	Pandas	
Matplotlib	scikit-learn		
TensorFlow	Keras	OpenCV	
SQL	Git	GitHub	
Visual Studio Code			
Jupyter Notebook	Canva	Figma	
FastAPI	LangChain	LangGraph	

PROJECTS

Movie Recommendation System

📅 10/2025 - 11/2025

A movie recommendation system implemented using Python

- Built a hybrid recommendation system using ANN and fuzzy logic for personalized suggestions
- Processed user data and improved recommendation relevance
- Tech: Python, TensorFlow, Pandas

GitHub: [MOVIE-RECOMMENDATION-SYSTEM](#)

Live Sign Language Transcription System

📅 10/2025 - 11/2025

• Developed a real-time ASL transcription system using RNN-LSTM

- Enabled live gesture recognition using OpenCV

• Tech: Python, TensorFlow, OpenCV

GitHub: [LIVE-SIGN-LANGUAGE-TRANSCRIPT](#)

Cricket Match Winner Predictor

📅 03/2025 - 04/2025

Predictive model for cricket match winners

- Built a supervised ML model to predict match outcomes using historical data

• Performed feature engineering and model evaluation

• Tech: Python, scikit-learn, Pandas |

GitHub: [ML-PROJECT](#)
