EDUCATION

Amrita Vishwa Vidyapeetham

Bachelor of Technology in Electrical and Computer Engineering

Coimbatore, Tamil Nadu

Aug. 2023 – April 2027

EXPERIENCE

AI/ML Intern

Edunet Foundation

June 2025 – July 2025

- Completed a 4-week AICTE Microsoft internship focused on AI, ML, and Azure Cloud
- Built a supervised ML model in Python for cricket match outcome prediction using data preprocessing, feature engineering, and model evaluation.

AI & Edge Computing Intern

Larsen & Toubro

June 2026

Chennai, India

- Developed an AI-based Biomedical Waste Segregation Monitoring System for automated biomedical waste classification using Computer Vision techniques.
- Built and annotated a biomedical waste dataset comprising **9,124 images** across **8 waste categories** using Roboflow.
- Collaborated in training, testing, and validation of a YOLOv11 Nano object detection model for biomedical waste detection.
- Presented project outcomes, methodology, and implementation results to industry mentors and stakeholders.

PROJECTS

Biomedical Waste Segregation Monitoring System | *Python, YOLOv11, OpenCV, Streamlit, Power BI*

- Developed an end-to-end Computer Vision and Object Detection system for automated biomedical waste classification and disposal-bin recommendation.
- Built and annotated a dataset of 9,124 images across 8 biomedical waste classes using Roboflow.
- Achieved **95.5% mAP@50, 91.4% Precision, and 95.4% Recall** through training and evaluation of a custom object detection model.
- Developed Streamlit and Power BI dashboards for real-time monitoring, reporting, and waste analytics.

GitHub Link - Biomedical Waste Segregation Project

Live Sign Language Transcription System | *Python, TensorFlow, OpenCV, RNN, LSTM*

- Developed a real-time American Sign Language (ASL) transcription system using deep learning techniques.
- Designed an RNN-LSTM architecture for sequential gesture recognition and real-time text generation.
- Implemented OpenCV-based gesture capture and preprocessing pipelines for live inference.

GitHub Link - Sign Language Transcription Project

Movie Recommendation System | *Python, TensorFlow, Pandas, ANN*

- Developed a hybrid recommendation engine combining Artificial Neural Networks (ANN) and fuzzy logic techniques.
- Generated personalized movie recommendations using user preference and behavioral data.

GitHub Link - Movie Recommendation System

Cricket Match Winner Predictor | *Python, Scikit-Learn, Pandas*

- Developed a supervised machine learning model for cricket match outcome prediction using historical match data.
- Performed feature engineering, data preprocessing, and model evaluation using scikit-learn.

GitHub Link - Cricket Match Winner Predictor

TECHNICAL SKILLS

Programming Languages: Python, C/C++, SQL, JavaScript

Machine Learning & Deep Learning: Scikit-Learn, TensorFlow, Keras, Deep Learning, Feature Engineering, Data Preprocessing, Model Evaluation

Computer Vision: OpenCV, YOLOv11, Object Detection, Image Classification, Dataset Annotation, Data Augmentation

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Power BI, Exploratory Data Analysis (EDA)

AI Frameworks: LangChain, LangGraph

Development & Deployment: Streamlit, FastAPI, Git, GitHub, Roboflow, Transfer Learning, Neural Networks
